I am an experienced Full Stack Laravel Developer with a strong background in both backend and frontend technologies. I focus on creating dynamic and user-friendly applications, ensuring that my code is clean, efficient, and scalable. I excel at integrating complex features and am dedicated to delivering high-quality solutions. I am always eager to expand my skills and stay updated with modern web development trends.

Professional Experience

Full Stack PHP Laravel Developer, StepInnSolution

Jun 2024 – present
DHA, Lahore, Pakistan

- Designed, developed, and maintained full-stack web applications using the Laravel framework, ensuring robust backend logic and dynamic frontend interfaces.
- Implemented version upgrades for Laravel applications, ensuring compatibility and leveraging new features for enhanced performance.
- Developed and configured RESTful APIs, enabling seamless integration with third-party services, including Google and Microsoft Azure for user authentication.
- Installed and configured various Laravel packages to extend application functionality and improve development efficiency.
- Managed and optimized databases, primarily using MySQL, to ensure efficient data storage, retrieval, and scalability. Implemented complex database queries, indexing, and migrations.
- Optimized application performance by implementing caching strategies, query optimization, and load balancing to handle high traffic and large datasets.
- Actively participated in Agile development processes, including sprint planning, daily stand-ups, and code reviews, to deliver features and improvements iteratively.

Junior PHP Laravel developer, Interware Pvt

Aug 2023 – May 2024

- Developed and maintained web applications using the Laravel framework, following best practices in coding, testing, and deployment.
- Collaborated with cross-functional teams, including frontend developers, UI/UX designers, and project managers, to deliver high-quality software solutions.
- Designed and optimized database schemas using MySQL, ensuring efficient data storage and retrieval, and maintaining data integrity.

- Worked on API development and integration, creating RESTful APIs and integrating third-party services into existing applications.
- Utilized version control systems like Git for managing code repositories, branching, and merging code changes, and collaborated with team members on pull requests.
- Implemented security measures, including data encryption, secure authentication, and protection against common vulnerabilities like SQL injection and XSS.

PHP Laravel internship

Jul 2022 – Jan 2023

Lahore, Pakistan

- Deepened understanding of the Laravel framework, including its core features such as routing, middleware, Eloquent ORM, and blade templating.
- Gained practical experience in full-stack development, from backend logic to frontend design.
- Improved problem-solving skills by working on real-world projects and debugging complex issues.
- Participated in daily stand-ups, code reviews, and sprint planning meetings to improve coding practices and project outcomes.
- Worked with version control systems like Git to manage code changes and collaborate with team members effectively.

Projects

Consentio

2019 – present

Consentio is a Software as a Service (SaaS) platform designed to empower organizations by facilitating the creation and management of customizable forms for user engagement. Each organization can manage its users, allowing them to create tailored forms to gather insights and feedback from their audience. The platform supports multilingual functionality, enabling users to switch between English and French languages, ensuring accessibility and inclusivity for diverse user groups. Through its user-friendly interface and robust features, Consentio enhances communication, data collection, and overall organizational efficiency.

Socrai

2021 – present

Socrai is a SaaS web application designed to foster community engagement through tribal collaboration. Users can join various tribes by submitting requests, participating in rich discussions organized around specific topics defined by the tribe's admin. Each topic features a variety of questions, ranging from simple queries to more complex exercises. The platform incorporates an interactive chatbot that awards points for users who ask relevant questions and successfully answer locked exercise questions related to those inquiries, promoting active learning and engagement. Additionally, users can contribute to discussions by commenting on topics, facilitating a dynamic and interactive community experience.

theGrowGreen

Jun 2024 – Jul 2024

GrowGreen is a web application dedicated to promoting environmental sustainability through donations. As a full-stack Laravel developer, I contributed to building and enhancing a platform where users can support green welfare initiatives. The platform allows users to make donations directly to the company or through various channels such as registered nurseries, transporters, and seed providers.

- **Entity Registration and Display:** The platform features a comprehensive system to register and display nurseries, seed providers, and transporters, showcasing their profiles and facilitating targeted donations.
- **Payment Integration:** Integrated secure payment options to ensure smooth and reliable transactions.
- **Responsive Design:** Developed with a mobile-first approach, ensuring accessibility and ease of use across all devices.
- **Admin Panel:** Built an admin panel to manage donations, registered entities, and user data, with options to track and report on various activities.

iTrader, trading platform

Sep 2023 – May 2024

iTrader is a comprehensive trading platform with distinct panels for Admin, Broker, Manager, and User, each providing specific functionalities and access levels tailored to their roles.

- Assisted in designing and developing CRUD operations for different panels, including user management, trading transactions, and reporting features.
- Collaborated with senior developers to integrate third-party APIs for real-time data retrieval and trading operations.
- Participated in regular code reviews, contributing to improving code quality, performance, and security across the application.
- Implemented unit and integration tests to ensure the stability and reliability of new features and updates before deployment.

Education

BS Computer Science, Punjab University College of Information and Technology

2018 – 2022
Lahore, Pakistan

**FSc pre Engineering,
Punjab Group of Colleges Muslim Town Lahore**

2015 – 2017
Lahore, Pakistan

Professional Skills

Laravel Framework :

Experienced in developing web applications with Laravel, specializing in CRUD operations, authentication, and middleware. Proficient in upgrading applications from lower versions to the latest releases while ensuring compatibility.

Front-end Technologies :

Proficient in front-end technologies such as HTML, CSS, and JavaScript, facilitating seamless collaboration with front-end developers to deliver cohesive and user-friendly applications.

Database Management :

Proficient in relational database systems such as MySQL, with expertise in database design, optimization, and the ability to construct and resolve complex queries and algorithms for enhanced data management and performance.

APIs Development

Proficient in developing custom APIs and integrating third-party APIs to enhance application functionality. Experienced in ensuring seamless data exchange between systems.

Courses

Web Development, KICS UET

Jun 2022 – Aug 2022

Frontend Development, PHP, Wordpress, Elementor Pro, Shopify, Database, FlowCharts, Object Oriented Programming.

Application Development with Laravel, Mind Luster

Jun 2023 – Aug 2023

Laravel Development, Blade Template, Service Container, MVC Model, Package Configuration, Payment Gateway, Rest APIs

Awards

Peef Scholarship, Punjab Endowment Fund Pakistan

2015

Got Peef Scholarship after taking position in class 10th.
